## About

Innovative Backend Developer with over 5 years of experience creating and optimizing robust and scalable solutions, with solid experience in fullstack projects. Specialized in developing efficient architectures and implementing high-quality code that drives performance and user experience. Consistently delivers excellence in software and possesses advanced skills in analysis and problem-solving. Proficient in using modern technologies and frameworks to achieve technical and business objectives.

## Skills

PHP - Laravel - MySQL - PostgreSQL - Docker - API - RESTful - Livewire - JavaScript - React - Vue - Tailwind - CSS - HTML - Git - CI/CD - SOLID - OOP - Clean Code - DDD - TDD - Design Patterns - MVC - AI - jQuery - Wordpress - Shopify - Webflow - Elementor - Hubspot - OWASP - RabbitMQ

## Professional Experience

### Back End Developer, (*Before*) Campo Grande, Brazil 07/2024 - Present

- Designed and developed scalable RESTful APIs using PHP Laravel and Docker, implementing Redis cache layers and optimizing MySQL queries, ensuring high performance and stability in Linux environments.
- Responsible for developing multi-tenant systems, solving complex customization challenges for each client and streamlining critical biometric workflows, resulting in a 70% reduction in client onboarding time and supporting multiple business models simultaneously.
- Served as the technical liaison between back-end and QA/Front-end teams, ensuring smooth integrations and deliveries followed rigorous code quality standards and modern architecture.

### Freelance Web Developer, (*Formula X*) Copenhagen, Denmark 08/2023 - Present

- Executed WordPress site redesigns, achieving a 60% increase in PageSpeed and significantly improving organic ranking and end-user experience.
- Developed plugins and AI integrations on platforms like Elementor and Webflow, automating workflows that reduced client operational effort by an average of 20 hours per month.
- Managed 100% English-language projects for the European market, from requirements gathering to final delivery, maintaining a 95% satisfaction rate and contract recurrence.

### Back End Developer, (*SENAI Soluções Digitais*) Santa Catarina, Brazil 12/2022 - 05/2024

- Optimized job search and filtering flows, reducing database query response time by 50% and significantly improving the experience for thousands of concurrent users.
- Responsible for developing and maintaining Laravel APIs, implementing Design Patterns that enhanced the scalability of the job portal and ensured data integrity in high-volume Postgres environments.

### Fullstack Developer, (*Sertras Gestão de Fornecedores Ltda.*) Rio de Janeiro, Brazil 03/2022 - 12/2022

- Responsible for developing the supplier performance evaluation system, creating a robust architecture that automated feedback collection and reduced manual compliance analysis time by 40%.
- Managed web infrastructure on WordPress (Bakery/Elementor), optimizing page loading and plugin maintenance.
- Designed and implemented complex integrations with government APIs, ensuring real-time data synchronization and ensuring that 100% of tax and regulatory validations were processed automatically without errors.

### Trainee Developer, (*Dev4B*) Rio de Janeiro, Brazil 03/2021 - 03/2022

- Designed and implemented Inventory Control Systems using PHP Laravel and MySQL, where automation of inflow and outflow workflows resulted in a 40% reduction in operational management time and eliminated manual counting errors.
- Created high-conversion Landing Pages for external clients using HTML, CSS, Bootstrap and Javascript, focusing on performance and responsiveness, which increased user engagement on developed pages by 25%.
- Managed production environments and servers via FTP on Linux Ubuntu systems, ensuring application stability and performing continuous deployments securely and quickly.

## Certifications

---

- SCRUM FUNDAMENTALS (Feb. 2024) - [SCRUM](#)
- OWASP top 10 Web Application Security (Apr. 2024) - [Udemy](#)
- LARAVEL: CREATING AN APPLICATION WITH MVC (Jun. 2021) - [Alura](#)
- REACT: WRITING WITH TYPESCRIPT (Jun. 2022) - [Alura](#)

## Education

---

**Information Systems** [UniFOA - University Center of Volta Redonda](#) **Rio de Janeiro, Brazil** 2021-2024

Data Structures and Algorithms, Database Management (SQL/NoSQL), Software Engineering, Object-Oriented Programming, Operating Systems, Distributed Systems, Computer Networks, and Artificial Intelligence (AI).

**Computer Technician** [Pandiá Calógeras Technical School](#) **Rio de Janeiro, Brazil** 2018-2020

Programming Logic, Computer Maintenance and Configuration (Hardware), Computer Networks, Web Development (HTML/CSS/JS), Databases, Operating Systems, Information Security, and User Technical Support.

## Languages
